STANFORD ICHTHYOLOGICAL BULLETIN

Volume 4

Comprising 5 numbers, 17 articles, 294 pages,
189 figures, 22 tables, and 5 maps

Published by the

NATURAL HISTORY MUSEUM OF STANFORD UNIVERSITY

Stanford, California, U. S. A.

1951-1954

NOTICE

The Editors hereby affirm that copies of each of the five numbers of Volume 4 were mailed, on or before the imprinted dates of publication, to the chief zoological, ichthyological or natural history museum libraries of Ann Arbor, Berkeley, Cambridge, Chicago, Honolulu, New Haven, New York, Philadelphia, San Francisco, Seattle, Washington, Berlin, Calcutta, Cape Town, Copenhagen, La Plata, Leningrad, London, Paris, Rio de Janeiro, Sydney; and to the editors of Science and Nature. At the same time copies were placed on public sale at the Natural History Museum. The remainder of the copies distributed directly by the Museum were mailed upon or within a few days of the publication dates. Copies distributed through the Stanford University Library were frequently delayed for a short time.

Volume 4 has been edited by Margaret Storey and G. S. Myers.

Volume 5, complete in one issue, was published on July 31, 1953, previous to the completion of Volume 4. Therefore the next volume will be Volume 6.

All communications concerning purchase or exchange of this publication should be addressed to the Director, Natural History Museum, Stanford University, Stanford, California. Remittances should be made payable to Stanford University.

INDEX TO VOLUME 4

New taxonomic names are marked with an asterisk (*).

Aboul-Ela, I. A., 37

ERRATA

Stanford Ichthyological Bulletin, Volume 4

Page 3: Paragraph 4, line 4, read "Goode" for "Boode".

Page 79: Heading, place parentheses around "Gilbert".

Page 86: Graph 33, size-group 3, read "*integripinnis*" for "*integeri-pinnis*".

Page 108: Line 1, read "oviparous habit" for "oviparous young".

Page 119: Paragraph 5, line 2, read "*Vallisneria*" for "*Vallisnaria*"; line 3, "*Phyllospadix*" for "*Phallospadix*".

Page 120: Graph 60, delete comma after "*montereyensis*".

Page 142: Lines 7 and 8, read "has a pectoral fin similar in length to" for "is intermediate between *elegans* and."

Page 143: Graph 71, bottom, insert vertical line above "32", opposite "Guadalupe deep water populations".

Page 151: Line 8 from bottom, read "this race is" for "these specimens are".

Page 164: Top, read "SCHULTZ, Leonard Peter" for "SCHULTZ, Leonard Paul".

Page 175: Figure 6, legend, read "X" for "F" type scale.

Page 193: Figure 1, place dot at upper right of graph for the Ikroavik Lake fish of "normal" form, 411 mm. head-to-fork length, weight 968 grams, mentioned in text.

Page 230: Paragraph 6, line 1, read "subfamily" for "family"; lines 3, 6, 8, and 14, read "*Rhaphiodon*" for "*Raphiodon*".

Page 232: Key, 1b., read "Pelvic rays 1,4 or v"; 3a., next to last line, read "Scopoli" for "Gronow".

Page 234: Heading, read "GASTEROPELECUS Scopoli" for "GASTEROPELECUS Gronow".

Page 238: Paragraph 2, line 5, read "13003" for "130031".

Page 243: Paragraph 1, line 10, read "Gasteropelecinae" for "*Gastero-pelecinae*".

Page 263: Under NELSON, 1949, read "*Rhaphiodon*" for "*Raphiodon*".

Page 266: Paragraph 3, line 2, delete "the" before "*Planaltina*".

Page 272: Paragraph 1, line 9, read "complex" for "complete".

Page xv: Index, column 3, read "*Rhaphiodon*" for "*Raphiodon*".

CONTENTS

ANONYMOUS
News notes on the Stanford center of fish and fishery work.
Issued December 27, 1951..... 35-37

BÖHLKE, JAMES
Description of a new auchenipterid catfish of the genus Pseudepapterus from the Amazon Basin.
Issued December 27, 1951..... 38-40
Meadia, a new genus for the west Pacific dysommid eel, Dysomma abyssale Kamohara. Issued December 27, 1951..... 6
Studies on fishes of the family Characidae, No 7. A new genus and species of glandulocaudine characids from central Brazil. Issued August 23, 1954.....265-274

BÖHLKE, JAMES, and BRIGGS, JOHN CARMON
Callechelys cliffi, a new ophichthid eel from the Gulf of California. Issued August 23, 1954.....275-278

BÖHLKE, JAMES, and HUBBS, CARL LEAVITT
Dysommina rugosa, an apodal fish from the north Atlantic, representing a distinct family. Issued December 27, 1951..... 7-10

BÖHLKE, JAMES, and MEAD, GILES WILLIS
Physiculus jordani, a new gadoid fish from deep water off Japan.
Issued December 27, 1951..... 27-29

COHEN, DANIEL MORRIS
Age and growth studies on two species of whitefishes from Point Barrow, Alaska. Issued August 16, 1954.....168-187

FREEMAN, HARRY WYMAN
Two new agonid fishes from the Sea of Japan.
Issued December 27, 1951..... 22-26

HARRY, ROBERT REES
A new cusk-eel of the genus Ophidion from California with notes on the genus. Issued December 27, 1951..... 30-35

HUBBS, CLARK
A contribution to the classification of the blennoid fishes of the family Clinidae, with a partial revision of the eastern Pacific forms. Issued April 15, 1952..... 41-165

MYERS, GEORGE SPRAGUE
David Starr Jordan, Ichthyologist, 1851-1931.
Issued December 27, 1951..... 2-6
Fresh-water fishes and East Indian Zoögeography.
Issued December 27, 1951..... 11-21
Some forgotten but available names for Indian fishes.
Issued December 27, 1951..... 26

WEITZMAN, STANLEY HOWARD
The osteology and the relationships of the South American characid fishes of the subfamily Gasteropelecinae.
Issued August 23, 1954.....213-263

WILIMOVSKY, NORMAN JOSEPH
List of the fishes of Alaska.
Issued December 17, 1954.....279-294

WOHLSCHLAG, DONALD EUGENE
Growth peculiarities of the cisco, Coregonus sardinella (Valenciennes), in the vicinity of Point Barrow, Alaska.
Issued August 16, 1954.....189-209

ADVERTISEMENT

The Natural History Museum, a division of the Department of Biology of Stanford University, offers regular academic instruction and research opportunities in various branches of Ichthyology, leading to the degrees of Master of Arts and Doctor of Philosophy in Biology. The Faculty members principally concerned are Professor George S. Myers (fish systematics, morphology, behavior and geography) and Professor Donald E. Wohlschlag (population dynamics and ecology of fishes).

Ichthyological instruction and research are also carried on at the Hopkins Marine Station, located at Pacific Grove on Monterey Bay, about 100 miles south of the University. This station is also a division of the Department of Biology of Stanford University. The Faculty member there concerned is Professor Rolf L. Bolin (systematics, morphology and ecology of California marine fishes).
